

West Fraser

STABLERV™

ENGINEERED STRAND
PRODUCTS

ESP

ENGINEERED TO SUIT THE NEEDS OF THE RECREATIONAL VEHICLE (RV) MANUFACTURING INDUSTRY

- For use in floor, roof and slide-out applications
- Available in widths from 48" to 100", and up to 294" in length
- Available in thicknesses from 3/8 to 1
- Customized sizes available to optimize panel usage and reduce waste
- Panels can be sized to meet special design specifications
- One-piece per size requirement eliminates seams and reduces waste, time and labor
- No core voids, knots or other defects, every panel is 100% useable
- Panels lay flatter than alternatives, with no warping or cupping
- Meets or exceeds APA PS2 standard (only our standard RV panel is APA-stamped)
- CARB (California Air Resource Board)-exempt, free of any urea-formaldehyde resins
- To ensure uninterrupted customer supply, timely and cost-effective shipments, West Fraser's StableRV panels are manufactured in facilities throughout the US and Canada
